

# Emergency Lighting Control For Use With Sigtex DC Central Battery Systems

## Series ELC Package Type P2

ELCP2.12.25.18

### GENERAL DESCRIPTION

ELC converts any LED luminaire operating from normal AC or 24VDC power, to emergency lighting operation powered from a Sigtex central battery system. Constant power output is factory adjustable to optimize emergency illumination level and fixtures may be on, off, switched or dimmed in normal mode without affecting emergency operation. General lighting fixtures with ELC may be combined with MOONLITE LED™ emergency luminaires and exits in the central battery system, as required.

Typical applications for Type P2 may include 2 x 2 or 2 x 4 LED flat panel or other lay-in designs, with normal power ranging from 10W to 70 watts or more.

All Sigtex central battery systems Series CBL and CBM include fully automatic self-test, self-diagnostics. Series CBM includes the MARS™ Monitoring and Reporting System which provides cloud-based internet communication and fault reports delivered automatically via email for all components of the emergency system.

### CONSTRUCTION & OPERATION

- Factory or field installable in the Fire and Electrical Enclosure of listed fixtures.
- Normal lighting operation is not affected by ELC operation.
- Compatible with all types of dimming and lighting controls.
- Standard mount= Hi temp VHB DF tape and flange for screw mount

### ELECTRICAL

- Input 24 VDC.
- Constant emergency power output is factory adjustable from 5W to 20W .
- Output voltage auto sensing range up to 54V.
- Adjustable emergency lumen output allows optimum settings for any fixture to equal or exceed requirements of NEC and NFPA 101 codes for varying mounting heights and other conditions.
- Available for LED fixtures operating from 10W to 70W or higher in normal mode.
- Optional DC models available for compatible LED fixtures operating from 24VDC normal power.
- High Efficiency, 90%@24VDC input.
- OVP, SCP, OTP Protections.

### CODES

- UL Listed in compliance with UL Standard 924 and CAN/CSA C22.2 No. 141-15 for field or factory installation in Fire and Electrical Enclosure. All Sigtex Central Battery Systems and MOONLITE LED emergency fixtures are Listed to UL Standard 924.

## For Use With Signtex DC Central Battery Systems

## Series ELC

### Package Type P2

ELCP2.12.25.18

### SUGGESTED SPECIFICATIONS:

Supply and install Signtex Emergency Lighting Control Series ELC which shall be capable of operating a LED general lighting fixture in emergency mode for a minimum of 90 minutes following failure of the normal power supply to the fixture, when connected to a Signtex DC Central Battery System.

### ELECTRICAL SPECIFICATIONS

Driver current is settable at the factory, to produce the output voltage and power ranges given below in Table 1.

Emergency power output (EPR) is adjustable through the range given below. Power should be specified to ensure illumination on the path of egress complies with NFPA Life Safety Code101, based on photometric data and efficacy for the fixture in use. To determine compatibility of ELC devices and output power required for specific applications, See ELC SPECIFICATION GUIDE.
